

ii Manual Destination Display System

indicators
International

The Traditional, Original Winner

As the world's leading supplier of manual display systems Indicators International manufacture and supply the highest quality manual system backed up by personal customer support throughout the life of your system.

Manual display systems use printed blinds on a mechanical roller system to allow manual operation of the display. The result is a very reliable and cost-effective display system.

Manual systems offer the perfect solution for a wide range of customers.

- > **Traditional aesthetics.**
Operators in London use ii manual systems in keeping with the historic traditional look of a 'London Bus'. In historic and tourist settings the manual units create just the right traditional feel.
- > **Limited Budget**
Manual systems offer the lowest cost display product on the market at a fraction of the cost of its' electronic counterparts.
- > **Remote locations**
In situations where modern technologies are unserviceable, such as developing countries, manual units are reliable, easily maintained and are better suited to these extreme conditions. Recent orders of this type has sent ii Manual units to South Africa, Ethiopia and Jamaica.
- > **Smaller operators**
For the small business who want a cost-effective, clear, professional display system that is easy to operate and maintain. Introducing professional destination displays to your fleet presents a professional image and shows the desire to be customer-focused.

A key advantage of the blind systems is that even when the vehicle is switched off, the sign continues to be easily read.

With 50 years' experience in the manufacture of manual systems, Indicators are able to offer flexibility in the design and engineering of your manual system. In depth knowledge enables Indicators experienced staff to design and build a system to precisely fit your requirements.

Manual displays offer arguably the best visual clarity available on the market: they may have been around for 50 years but manual blind displays continue to offer a very competitive alternative to electronic systems.
